Summary

Aspiring Full-Stack Developer and AI Enthusiast with a strong passion for building scalable web applications and securing digital systems. Eager to leverage my skills in both development and security to create robust, user-friendly, and secure solutions. Committed to continuous learning and growth in software engineering and ethical hacking to contribute to innovative and resilient tech environments

Projects

- **E-commerce Web App (MERN Stack)**

A full-featured online shopping platform where users can browse products, add to cart, and place orders. Built with React, Node.js, Express, and MongoDB. Features include user authentication, product filtering, and admin dashboard.

- **UI Components Library (React + Tailwind CSS)**

A collection of clean, reusable UI components like buttons, cards, modals, and navigation bars. Designed for modern web apps using React and styled with Tailwind CSS. Perfect for rapid development and consistent design.

- **Group Chat App (Java)**

A simple real-time group chat application developed in Java. It allows multiple users to join a chat room, send messages, and communicate live. Great for learning networking and multithreading in Java.

- **Converso – AI-Powered LMS SaaS Platform.**

Built a full-stack learning platform with voice AI tutors using Next.js, Supabase, and Vapi. Integrated user authentication, subscriptions, and payments with Clerk and Stripe. Features include real-time sessions, AI tutor creation, smart search, and responsive UI with Tailwind CSS and shadcn/ui.
